

Dr. Tony's POMEGRANATE PLUS™

What is it?

Dr. Tony's Pomegranate Plus™ is a great source of Antioxidants. Mix with **Dr. Tony's Radiant Greens™** for a powerful blend of goodness in a smoothie. Packing a powerful array of vitamins, digestive enzymes, calcium, probiotics, and so much more, the need for supplementation has never been greater than it is today. Our foods simply do not have the same nutritional value of years past. Plants and vegetables absorb 67 vitamins and minerals from the soil. However, a typical farmer will add only three nutrients back into his soil. Over time, this practice creates a huge nutritional deficiency in our daily diets. **Radiant Greens™** helps you overcome this deficiency by providing the nutrition your body needs in every serving.

What is in it?

POMEGRANATE FRUIT & SEED

- Punicalagins (powerful antioxidants)
- Punicic acid - main fatty acid in the arils

CRANBERRIES

- Powerful antioxidant, anti-inflammatory, source of vitamin C, dietary fiber, manganese, vitamins E and K
