

Dr. Tony's **TURMERIC**™ WITH BLACK PEPPER & GINGER

What is it?

Despite its use in cooking for several thousand years, turmeric continues to surprise researchers in terms of its wide-ranging health benefits. **Dr. Tony's Turmeric™** formula offers an unmatched combination of select herbs and anti-inflammatories to support weight loss, cardiovascular problems and joint pain. Curcumin is the main active ingredient in turmeric. It has powerful anti-inflammatory effects and is a very strong antioxidant. Does NOT contain GMO's, corn, soy, wheat, gluten, maltodextrin, artificial flavors, dairy, coloring, stabilizers, pesticides or any artificial ingredients.

What is in it?

TURMERIC

- Active agents in turmeric useful for herbal medicine are called curcuminoids, an aid for digestive problems, supports liver function, relieves inflammation from arthritis and may help to suppress pain
